Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/751,008	Applicant(s) BARNES LEON ET AL.
	Examiner Michael Misiaszek	Art Unit 3625

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED. (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 10 April 2008.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 3-8, 11-21, 24, 26 and 28 is/are pending in the application.
- 4a) Of the above claim(s) 3, 11 and 17-21 is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 4-8, 12-16, 24, 26 and 28 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) Notice of References Cited (PTO-892)
 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
 3) Information Disclosure Statement(s) (PTO/SB/08)
 Paper No(s)/Mail Date _____
- 4) Interview Summary (PTO-413)
 Paper No(s)/Mail Date _____
- 5) Notice of Informal Patent Application
 6) Other: _____

DETAILED ACTION

Response to Amendment

Applicant's amendments filed 4/10/2008 have been received and reviewed. The status of the claims is as follows:

Claims 3-8, 11-21, 24, 26 and 28 are pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. **Claims 4-8, 12-16, 24, 26, and 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.**

Regarding Claims 24, 26, 28

Claims 24, 26, and 28 are rendered unclear and indefinite by the inclusion of the phrase "prior to converting the product management information." It is unclear which "converting" step this phrase is referencing, as there are two previous steps in the claimed method which recite "converting the product management information."

Appropriate correction is required.

Regarding Claims 4-8, 12-16

Each of these claims is rejected for at least its dependence on one of the independent claims cited above.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 4-8, 12-16, 24, 26, and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rappaport in view of Arai et al. (US 20030097642 A1, hereinafter Arai).

Regarding Claims 24, 26, 28

Rappaport discloses a method and medium comprising managing a product, comprising:

- extracting product management information in a first form, wherein the product management information comprises information regarding the managing of the product and the first form is associated with a first source computerized product management system (at least abstract: product design data for source system extracted from source system)
- converting the product management information in the first form, wherein the converting the product management information in the first form converts the product management information in the first form into product management

information that is in a second intermediate form (at least column 10, lines 1-8:
data converted into intermediate form and stored in bridge structure)

- converting the product management information in the second intermediate form
wherein the converting the product management information in the second
intermediate form converts the product management information in the second
intermediate form into product management information in a target form
the product management information in a target form corresponds to a target
computerized product management system (at least column 5, lines 1-16:
intermediary form converted to target form for target system)
- converting the information in the second intermediate form into multiple different
target forms (at least column 9, lines 15-27: bridge structure can be used for
storing information for conversion to more than one type of CAD system)
- the second intermediate form comprises a list of product elements for defining a
hierarchy of data elements (at least column 5, lines 24-35: intermediate form
can preserve parametrics, features of design)
- performing an update of an existing product management record in the target
computerized product management system using the product management
information in the target form (at least column 5, lines 36-46: once in target form,
design can be manipulated/updated)

Rappaport does not specifically disclose that the data being stored and converted in the method is product management information.

However, these differences are only found in the nonfunctional descriptive material and are not functionally involved in the steps recited. The extracting, converting, and performing steps would be performed in the same manner regardless of the data. Merely labeling the data in a specific manner would not alter the functionality of the claimed method. Thus, this descriptive material will not distinguish the claimed invention from the prior art in terms of patentability, see *In re Gulack*, 703 F.2d 1381, 1385, 217 USPQ 401, 404 (Fed. Cir. 1983); *In re Lowry*, 32 F.3d 1579, 32 USPQ2d 1031 (Fed. Cir. 1994).

Further, the examiner notes that Rappaport teaches using CAD systems for handling enterprise resource planning data (see at least column 1, lines 43-52), which is equated to product management information in the present specification.

Rappaport further does not specifically disclose that the performing and update is performed in response to the converting the product management information into a target form, and wherein the existing product management record resided in the target computerized product management system prior to converting the product management information. Arai teaches that it is known to include performing an update of an existing product record in response to an information conversion (at least paragraphs [0050], [0052] and [0056]: existing drawings record in drawings database updated following drawing changes after conversion) in a similar environment. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the method and medium, as taught by Rappaport, with the updating, as disclosed by Arai, since such a modification would have provided prevention of erroneous usage and assurance that formal design data is used through a supervised updating procedure (at least paragraph [0052] of Arai).

Regarding Claims 4-8, 12-16

Rappoport does not specifically disclose the hierarchy of specific data elements claimed.

However, these differences are only found in the nonfunctional descriptive material and are not functionally involved in the steps recited. The extracting, converting, and performing steps of independent claims 24 and 26 would be performed in the same manner regardless of the data. In other words, no matter the format or makeup of the product management information, the same steps would be performed. Merely arranging the data in a specific fashion or labeling the data in a specific manner would not alter the functionality of the claimed method. Thus, this descriptive material will not distinguish the claimed invention from the prior art in terms of patentability, see *In re Gulack*, 703 F.2d 1381, 1385, 217 USPQ 401, 404 (Fed. Cir. 1983); *In re Lowry*, 32 F.3d 1579, 32 USPQ2d 1031 (Fed. Cir. 1994).

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Misiaszek whose telephone number is (571)272-6961. The examiner can normally be reached on 9:00 AM - 5:30 PM, Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffrey A. Smith can be reached on (571) 272-6763. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
